# SALESPAD®

CardControl

CardControl

Process Your Credit Cards, Securely.

CardControl 3.0 is a PA-DSS certified credit card application that enables secure and efficient processing of credit card payments in Microsoft® Dynamics GP, SalesPad GP, and/or SalesPad ERP.

Features

- Multiple credit card storage
- Encryption and card number masking
- Transaction processing, logging, and reporting with stored credit cards and/or tokens
- Level 2 and 3 verification processing (*when available from processors*)
- Real-time processing with address and Zip Code verification (*when available from credit cardholders' banks*)
- Support for credit card swipe devices
- Credit card tokenization, reducing PCI requirements and data breach risks *(when available)*

Payment gateways

Support for multiple payment gateways:

- 3DeltaSystems
- Authorize.Net
- BluePay
- Century Business Solutions' EBizCharge
- Moneris
- First Data's Payeezy
- Payflow Pro
- Vantiv
